

Main Project Abstract

Vigilant Safety Partner

ALPHYA T BABY, S6-10

Department of Computer Applications

Rajiv Gandhi Institute of Technology, Kottayam

An Application for Fire and Safety department in UAE civil defence to track the safety officers and device capacity. The pressure and density of the breathing apparatus attached with the officers are monitored through the application.

A warning is sent to the Team head when the air supply is reduced too low in the apparatus. Also a final report and details of officers from other department will also be monitored.
